To Whom it may concern:

**REACH Regulation (EC) No 1907/2006 and the CLP Regulation (EC) No 1272/2008
Customer Information: Compliance confirmed in REACH-EN-FORCE-2 (January 2017)**

for further information we send you the current status of implementation concerning REACH and CLP. The responses from our suppliers are evaluated and documented in a database (Fit4REACH Navigator). The suppliers have (pre-) registered, the relevant materials for use as raw material in the production of coatings, coating systems and products derived there from.

Here, a separate pre-registration is not necessary, since the availability is secured. Nevertheless, we have preregistered relevant substances in addition and notified (CLP) if necessary.

Updated safety data sheets are delivered on time and we implement it.

So far, no substances have become known, due to the REACH or CLP (cost /dangerousness: SVHC) could not be delivered. Candidate Substances Lists 10/2008 to 01/2017 (173) in the products are not present and will be avoided.

We check the status of REACH and CLP in internal audits.

The REACH and CLP-conformity has been assessed externally by the authorities. There were no deviations or evidence, so we can ensure absolute conformity to REACH and CLP.

Sincerely
Dr. Heinz Herzog
(REACH- Representative)
